

WizarView

Smart TMS Platform

wizarPOS

Smart Cloud POS Management Soalution

Features 1/2

01.

Group Management

- Configure applications, parameters or firmware
- Push applications
- View applications download and installation state

02.

Terminal Management

- Search and view the terminal information and status: firmware version, BT MAC, WIFI MAC, IMEI, etc.
- Remotely configure apps and parameters for terminals

03.

Application Management

- Support multiple types of applications: APK, firmware, parameter
- Manage multiple apps version
- Add , delete, update apps on TMS
- Configure app for specific group of terminals
- Configure app for specific terminals

04.

Tag Management

- Configure apps cross different groups and terminals

05.

System Management

- User management
- Role management
- User privilege management

Features 2/2

06.

Audit log Management

- User operation logs

07.

Security Communication

- Signature for communication messages
- Support HTTPS for web portal login

08.

Download Feature

- Apps and parameter download
- Firmware download
- Breakpoint resume
- Downloading monitor

09.

Terminal Monitor

- Remote Diagnose, capture Log & download
- Terminal online state monitor
- Terminal position monitor
- Terminal memory, storage, etc.
- Fetch terminal installed applications

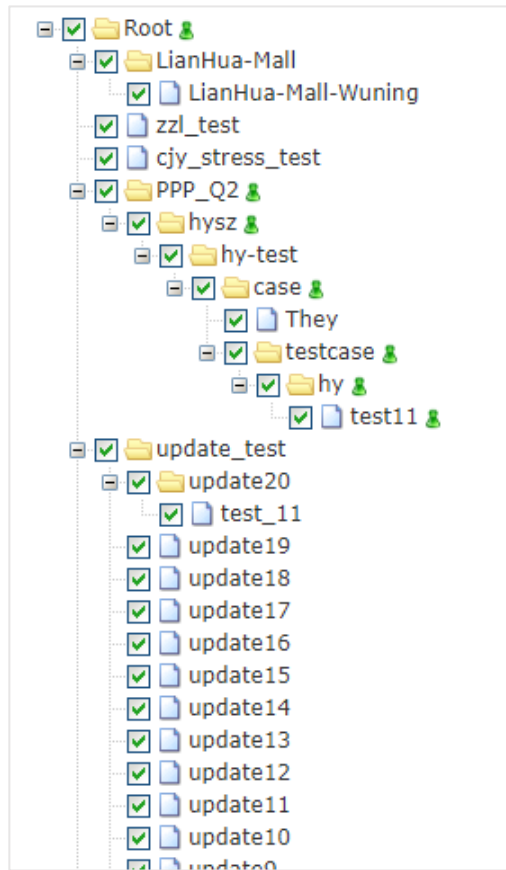

10.

Third-Party Integrate

- Provide Web Service API for 3rd party platform
- Allow integrate with partner own platform

Hierarchical Group Organization

1. Hierarchical node structure
2. Each node is a group
3. Each node has its own users, roles and system configuration
4. Each node has its own terminals, applications, tag, downloading jobs ...
5. Each node can manager terminals in all its sub nodes

Group Management 1/2

1. Hierarchical node structure
2. Configure applications, parameters or firmware by group
3. Push applications by group
4. View applications download and installation state in group

The screenshot displays the WizarPOS Group Management interface. On the left, a hierarchical tree structure shows a group named 'test11' containing several 'update' nodes (update1 through update20) and a 'test_11' node. On the right, the 'Group List' table is visible, with the 'Terminal State' button highlighted in red. The table contains the following data:

Name	Parent	Type	Country	State	Create Time	Operator
QD5	aileen	General	China	Anhui	2019-04-19 09:20:24	admin
QD4	aileen	General	China	Anhui	2019-04-17 15:04:33	admin
They	case	General	China	Anhui	2019-04-23 11:00:57	admin
aileen-Q2-download	aileen-Q2	General	China	Anhui	2019-03-14 09:59:41	admin
test11	hy	Terminal Manufacturer	China	Anhui	2019-04-22 13:34:24	admin
aileen-download	Q2-hsm	General	China	Shanghai	2019-01-16 1	admin

Group Management 2/2

1. Search and view the terminal information and status: firmware version, BT MAC, WIFI MAC, IMEI, etc.
2. Configure terminal attributes
3. Configure applications and parameters to each terminal remotely
4. Push applications by terminal group

Tag Management

1. Tag used to define a group of applications
2. Tag can be configured to terminals across different terminal group
3. The third-dimension way to configure the application except by terminal or by group

The screenshot displays the WizarPOS Tag Management interface. On the left, the 'Tag List' shows a table with columns for Name, Group, and Description. The 'stormTest' tag is highlighted, with Group 'Storm20170515' and Description 'cnm'. Below the list are buttons for '+', 'Info', 'Edit', 'Delete', and 'Share', along with a 'Config' button.

The main area is split into two panels, both titled 'Tag Config stormTest'. The left panel has tabs for 'Config Terminal', 'Config Application', and 'Batch Config Terminal'. It includes search fields for SN and Group, and a 'Configured Terminal' table with columns for SN, Name, Group, and Mode. The table lists three terminals: WP18331Q20202633 (QD4, Q2), WP17451Q20003163 (NEW, Q2), and WP16481P00000099 (Storm20170515, P1). Below the table is a 'Terminal List' table with columns for SN, Name, and Group, listing five terminals.

The right panel also has the same tabs. It includes search fields for Name and Type, and a 'Configured Application' table with columns for Group, Application, Name, File, Installation Moc, Config Time, and Operator. The table lists five applications for Storm20170515, each with a green status indicator and a config time of 2018-08-13 16:56:03. Below the table is an 'Application List' table with columns for Group, Application, Name, File, and Update Time, listing three applications.

Parameter Management

1. Easily configure application parameter
2. Easily configure parameter for each terminal uniquely
3. Update parameter with template easily

Terminal Map

1. View and search terminal in map
2. Check terminal deployment

System Management

1. User are configured in roles
2. Page permissions and access rights are defined to roles
3. System administrator assign the privileges to a specific user according to his role in the business scenario
4. Automatically lock user without login for a long time

The screenshot displays the WizarPOS System Management interface, divided into three main sections: User management, Role management, and Role Permission configuration.

User Management: Includes a search form with fields for Name, Group, Role, and Status (set to ALL), and a 'User List' table.

Name	Group	Role	Email	Description	Status
QQT	test11	Theauditor	huangyong@wizarpos.com		20
TCT	test11	Theauditor	huangyong@wizarpos.com		20
gong	test11	1232324	huangyong@wizarpos.com		20
yong	case	Theauditor	huangyong@wizarpos.com		20
aileen-aileen	aileen	所有权限	aileen.lin@wizarpos.com	test from aileen user name=aileen-aileen owner=aileen 2019 0109	20

Role Management: Includes a search form with a Name field and a 'Role List' table.

Name	Group	
1232324	test11	232131
Theauditor	hy-test	
Customer	WizarPOS	Custom
RMA-Administrator	WizarPOS	RMA-Ad
RMA-Customer	WizarPOS	RMA-Cu
aileen-RMA	aileen	aileen-R

Role Permission Configuration: A modal window titled 'Role Permission' with tabs for Applications, Terminals, Templates, Monitor, Settings, Resources, and Factories. The 'Applications' tab is active, showing a 'Repair Order' section with a 'CheckAll' checkbox and a grid of permissions for 'Application' and 'App Provider'.

Application	App Provider
<input checked="" type="checkbox"/> Query List	<input checked="" type="checkbox"/> Query List
<input checked="" type="checkbox"/> Update	<input checked="" type="checkbox"/> View
<input checked="" type="checkbox"/> Config-Upload	<input checked="" type="checkbox"/> Delete
<input checked="" type="checkbox"/> Terminal & Group Config	<input checked="" type="checkbox"/> Insert
<input checked="" type="checkbox"/> Application Summary	<input checked="" type="checkbox"/> App Config
	<input checked="" type="checkbox"/> Config-Delete
	<input checked="" type="checkbox"/> Config-Edit
	<input checked="" type="checkbox"/> Update
	<input checked="" type="checkbox"/> Delete

Buttons for 'Commit' and 'Cancel' are visible at the bottom of the modal.

Audit Log

1. The TMS records each user action information.
2. Help manager audit user behavior and correct user error actions.

The screenshot displays the 'AuditLog' interface. At the top, there are search filters: 'User' (text input), 'Log Of History' (checkbox), 'Time' (range input), 'Action Type' (dropdown menu set to 'All'), and 'Target' (text input). A 'Search' button is located to the left of a search input field. Below the filters, a table lists audit entries. The table has columns for 'User', 'Action Type', 'Target', and 'Description'. A dropdown menu is open over the 'Action Type' column, listing various actions such as 'search application list', 'save application', 'delete application', etc. The table shows entries for 'admin' users performing actions like 'user login' and 'login Successfully'. The bottom of the interface includes a pagination bar showing '1 of 490' and '15' items per page, along with a total count of '1 - 15 of 7,350'.

User	Action Type	Target	Description
admin	user login		login Successfully
admin	user login		login Successfully
admin	search application list	Test123	OWNER: test11
admin	save application	Mall	OWNER: test11
admin	delete application	RMA-Customer	
admin	search terminal register list	RMA-Administrator	
admin	save application	Customer	
admin	save terminal register		
admin	delete terminal register		
admin	Save Repair Order		
admin	Delete Repair Order		

1. Apply for maintenance service through Wizarview.
2. Detailed maintenance records and clear status.
